

Knitted fan scarf
Print area 140 cm x 18 cm

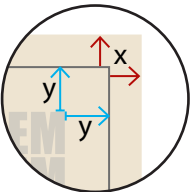

Area of design on product.

Diagrams are not to scale

Bleed (x)
1 cm

Safety distance (y)
1 cm

A = file format
B = finished size

Print file delivery:

- As a PDF file
- Only vectorised files
- Design must be created 100 % in full-tone colours
- Maximum 4 colours possible
(see info page yarn colours fan scarves)
- Minimum font height 20 mm (small letters)
- Minimum line thickness 6 pt

Please create the front and back in one file. Note the layout sequence.
The scarf is folded and sewn together.

Information

General note on layout software

You need a layout program with which full-tone colours (special colours) can be stored as the colour mode (e.g. InDesign, Illustrator, QuarkX-Press, CorelDraw etc.) – Office programs and image editing programs are not suitable for creating print data for this product!

Yarn colours fan scarves

IMPORTANT

Name the colour in your graphic design software exactly as seen in the table under „Colour name“. Pay attention to spaces (no space at the end), upper case / lower case letters, no umlauts.

The colour representations **do not** guarantee an exact match with the actual yarn colours. You are on the safe side if you use an original colour fan for comparison.

In the “Colour assistance” column, Pantone values provide an approximate match to the yarn colours.

Colour	Colour name	Colour assistance PANTONE
	E01	Similar to White cold
	E02	Similar to White warm
	E04	Similar to 7549 C
