

Self-inking rubber stamp

Printy 4913

- ! Do not mirror the artwork!
The stamp is automatically produced as a mirrored image.

Data delivery:

- It is compulsory to create objects / text in 100% black
 - no grey scales
 - white areas will be omitted.
- Please do not apply any settings for grey scales, grids and effects such as gradients, transparencies or cast shadow
- Please set the resolution to a minimum of 600 dpi
- Minimum font height: 1.4 mm (lower case), (7 pt)
- The thinnest character should not be any smaller than 0.3 mm
- Please use sans-serif fonts (e.g. Arial) preferably
- Lines have to be at least 1 pt, (0,35 mm)
- Preferably create vector graphics for any graphic objects

Attention: In case of large areas, a tangling rubber stamp print image can occur for production reasons.

Sketches are not to scale

A = Artwork format
B = Text plate

- ! The text panel size indicated provides the maximum stamping size: for production purposes and stamp durability, the panel is cut to the size of your motif with each individual order.

The threshold value determines whether gray scales (edge smoothing) will be white or black. This value is set at approximately 50% and may vary by +/-5% after any conversion. Please create the printing elements significantly above 50%.

Exchanging ink-pad

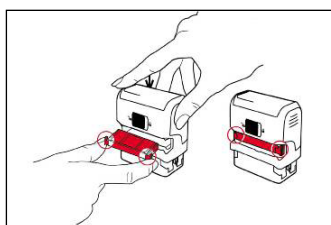

„Printy“

1. Push down stamp slightly. Fix with stop button (on the back).

2. Exchange ink-pad.

3. Unlock: push down stamp again.
